Cisco Internship Opportunity within Cisco Service Sales organization, Warsaw
Data Analyst Intern

The Opportunity:
Cisco is changing the way we work, live, play and learn. If your desire to work with leading-edge technology is matched by your drive to succeed in a highly collaborative, fast paced and global environment then Cisco is the right opportunity for you.

We are actively seeking candidates for a one year placement on a Data Analyst Intern role within our Services Sales Team in Warsaw. Cisco Services organization consists of 2 divisions - Technical Services and Advanced Services. Technical Services organization provides technical support to our customers to ensure that Cisco products and network operate efficiently and benefit from the most up-to-date system and application software. Advanced Services - where our engineers are engaged in planning, implementation and optimization of customers’ network - helps to accelerate business results using an architectural approach, proven best practices, and Cisco networking expertise.

Cisco Services Sales organization is responsible for selling both Technical and Advanced services.

Data Analyst Intern’s responsibilities include (but not limited to):
- Work with multiple internal tools and data bases to collect and analyze information related to Service Sales
- Verify information, find and correct mistakes and ensure we have accurate data
- Make business recommendations based on the results of the data analysis
- Work closely with managers within Cisco Services Sales and Partner Sales Enablement teams
- Collaborate with other functional areas to help drive key business initiatives

Skills of a Successful Candidate Include:
- Have excellent analytical skills
- Be detail-oriented and enjoy working with big amount of data
- Have good communication and collaboration skills
- Have good prioritization and time management skills, ability to multitask and meet deadlines in a high pressured environment
- Be skilled in the use of Microsoft Word, Excel and PowerPoint
- Be confident, resilient and committed, with a highly developed team spirit
- Have a can-do pragmatic approach to problem solving
- Networking knowledge and Cisco Certification will be an advantage

Eligibility Requirements:
- Senior student able to work full time (flexible hours)
- Fluency in Polish and English languages (both written and verbal)
- The ability to live and work in Poland without additional immigration support from Cisco

Internship’s length: 12 months  Start date: February 2011  Location: Warsaw
