

Internet Centre of Excellence - Summer Internship

WHY IS THIS JOB IMPORTANT?

The Internet Centre of Excellence (ICE) is made up of a small team of technologists within Enterprise Network Technology in Thomson Reuters, supported by specialist systems and processes, that function as the centre of excellence for end/end Internet connectivity on behalf of the F&R business unit (and not only) of Thomson Reuters. The team performs proactive monitoring of network parameters for TR products delivered over the Internet and responds to any impairments by working with Tier1 ISPs and informing Frontline and Product teams about any issues that might have impact on our customers. We also serve as an advisor for suggested modifications to our Internet facing infrastructure.

SOME OF DAILY TASKS YOU WILL PERFORM:

- Troubleshooting
- Network Monitoring
- Use of Splunk to visualize Netflow data
- Use tools like Thousand Eyes, Dyn, Actual Experience, BGPlay, Looking Glass, Splunk
- Development of internal tools

WHAT DO YOU NEED TO BRING?

- English is essential for us
- Pursuing University level education (Preferably Computer Science or Telecommunication fields)
- Attention to detail, ability to learn quickly
- Good communication skills and ability to work effectively in a team

YOU RECEIVE:

- Training and access to Thomson Reuters Products
- Extensive use of your language skills
- Work in a multicultural environment and liaise closely with colleagues in different locations
- Soft skills trainings, networking opportunities
- Ability to participate in Thomson Reuters spots program (discounts at many cultural & leisure venues)
