

Department:	Product Development	Location:	Warsaw, Poland
Position:	Intern Software Engineer	Apply to: https://f5.com/careers/search-jobs?reqid=RP1007303#8846	

What we do:

F5 helps organizations seamlessly scale cloud, data center, and software-defined networking deployments to successfully deliver applications to anyone, anywhere, at any time.

F5's products allow our customers to build a dynamic infrastructure that aligns their IT capabilities with their evolving business needs. F5 creates a unified and flexible architecture that enables our customers to simplify management, reduce costs and deliver faster and better service to their customers and employees.

For our EMEA Product Development Centre we're offer **paid internship** for students of 3rd and 4th year with passion for coding, having an aptitude for networking and security.

Attractions of the Internship:

You will be working as part of a team focused on the development of the next generation of our flagship products such as BIG-IP, Big-IQ, APM, ASM, iWorkflow and others. The innovative, award-winning BIG-IP device delivers high availability, improved performance, application security and access control-all in one unit. It's also extraordinarily flexible and configurable.

Primary Responsibilities:

- Learn F5 solutions and technology stack
- Research, conceive, develop and test software applications to extend and improve on F5 Networks product offerings
- Solve all problems that come your way
- Maintains and improves technical design methodologies, processes and standards
- Documents software designs via functional specifications and other design documents
- Works closely with developers, testers, product managers and the operations team to ensure that owned product areas maintain high reliability, scalability and performance

Knowledge, Skills and Abilities:

- Completed at least 2nd year in Computer Science or related field
- Python coding skills
- Networking knowledge – including development experience at L2-L3 and L4-L7, UNIX/Linux
- Good verbal and written communication (English)

Internships are paid. Planned: August – September 2017.

Students may be offered a part time position based on their performance.
