

Full-stack Web Developer

Location: Warsaw

Responsibilities:

- Architect client and server-side web app infrastructure,
- Design and implement survey, dashboard, and reporting tools with rich visualizations,
- Take part in engineering best practices, including but not limited to: performing code reviews, developing testing strategy, and contributing to development wiki & blog,
- Provide feedback on and contribute long term digital strategy.

Requirements:

- 2-3 years of experience building scalable and reliable web applications,
- Proficiency with HTML5, CSS3, **JavaScript**, and responsive design,
- Experience in:
 - **AngularJS**, Backbone.js, or similar front-end web application frameworks,
 - Bootstrap, Foundation, or similar front-end presentation frameworks,
 - Express or similar back-end Node.js web application frameworks,
 - **MongoDB**. MySQL, PostgreSQL, or other RDBMS is a plus.
- Experience building RESTful web service APIs,
- Experience integrating 3rd party web services, especially enterprise APIs,
- Very good knowledge of English,
- Bachelor's degree in Computer Science or Engineering.

We offer:

- Working hours: 12:00-20:00,
- Opportunity to work with innovative technologies,
- Professional trainings,
- Friendly work atmosphere.
