Junior C and C++ developer. Graduate 0 to 3 years experience.

The company's main product is a high performance data platform. They are a rapidly expanding UK based company who are growing their team in Poland. This could be an exciting chance to work directly with the UK founders and see your new ideas implemented quickly. The work will include cutting edge high performance hardware.

This role will provide C and C++ development skills and expertise to projects needing a High Performance SQL based database.

There is an opportunity to develop new modules and packages that integrate into existing code.

Essential
- to collaborate effectively with all team members in the project.
- must be very flexible and expect to adapt to different tasks. The work will be on legacy C and also new C++ coding.
- one to two years’ experience in C and C++ development.
- eager to learn, is adaptable and relishes an opportunity to work in a fast paced environment.
- strong degree from a recognized university. Graduates without previous work experience are welcome if they can demonstrate very good C/C++ expertise.
- communicative English
- able to work between 9am and 5pm - there is a small amount of flexibility here.

DUTIES & RESPONSIBILITIES:
- Developing software on linux using the GNU GCC and GNU make tool chain, GNU build system and the eclipse IDE.
- Develop C and C++ code.
- Review existing code.
- Provide documentation to support new team members.
- Inception, Proof of Concept and research.
- Input into sizing and planning.
- Adopt Agile project management.
- Code reviews.
- Build, Deploy & Test.

REPORTING TO: CEO and Founder.

WORKING HOURS: Full-time contract after a probation period. Attractive salary paid also during the probation period.
Full time contract, with a view to going permanent. 09:00 to 17:30 with 1 hour lunch. There is flexibility within this via prior arrangement
